THE PROCESS

PROCESS

1.

TEXT ANALYSIS

Across the readings, I began highlighting recurring words and concepts. Four that appeared particularly frequently were human, information, function, and connection. Rather than treating these as separate topics, I began thinking about how they relate to one another. These readings pushed me to think about technology as more than a physical object. I'm interested in technology as something that mediates interactions between humans and their environment.

2.

CHOOSING A CASE STUDY

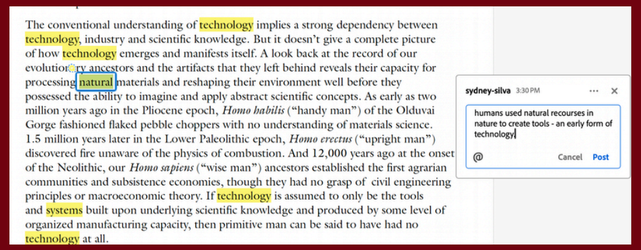

I chose the camera because it is a relatively simple technological system that allows me to examine all of these concepts at once. It takes information from the physical world and translates it into a form that humans can store, transport, reproduce, and interpret. To understand the camera as my case study, I wanted to look beyond the camera as an object and instead consider what it actually does. captures visual information from the physical environment that humans cannot.

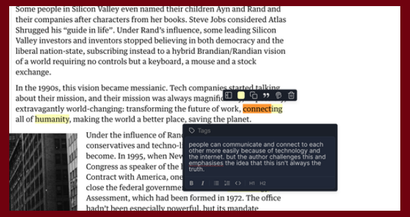

3.

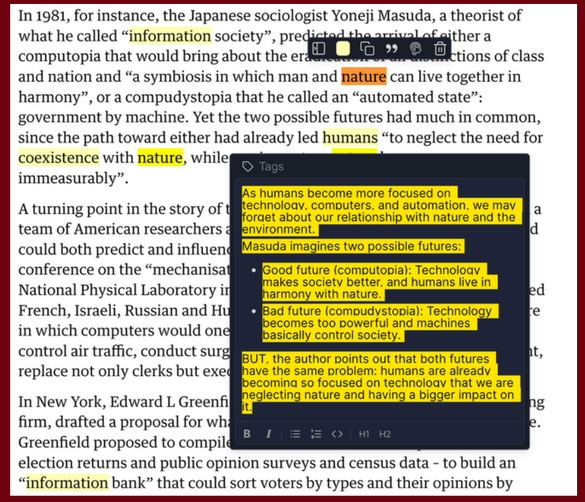

OUTCOME

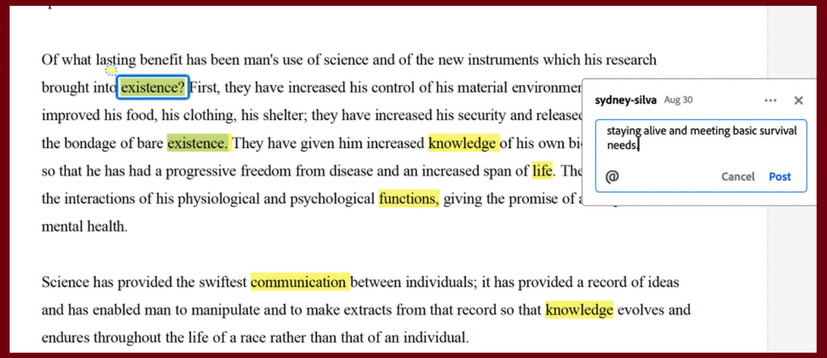

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Quisque non elit mauris. Cras euismod, metus ac finibus finibus, felis dui suscipit purus, a maximus leo ligula at dolor. Morbi et malesuada purus. Phasellus a lacus sit amet urna tempor sollicitudin. Cras pretium tempor elit blandit egestas. Donec sed dignissim augue. Suspendisse ac vulputate leo. Cras aliquet nunc ac velit cursus viverra. In hac habitasse platea dictumst. Nam tortor urna, semper ac nulla id, porttitor semper felis. Phasellus blandit eros viverra, ultricies nibh nec, viverra ipsum. Ut nec gravida massa, eu convallis est.

READINGS IN CONVERSATION

KEYWORD	TECHNOLOGY, DESIGN AND CONVERGENCE	DEFINITIONS OF COMMUNICATION	AS WE MAY THINK	THE RAMÓN LLULL'S THINKING MACHINE FOR AUTOMATED IDEATION	DEMOCRACY V THE MACHINE: THE BIRTH OF THE DIGITAL AGE AND THE WARNINGS THAT WERE IGNORED
HUMAN	DEVELOPED TECHNOLOGY BEFORE TECHNOLOGY WAS TECHNOLOGY	RELATABILITY TO AUDIENCE	COMPARING HUMANS TO MACHINES IN WHICH THEY HANDLE WORK		HUMANS = INDEPENDENT THINKERS
CONNECTION	TO CONNECT			RELATIONSHIP/SIMILARITIES	TECHNOLOGY = HUMAN CONNECTION
EXISTENCE	CURRENTLY PRESENT		MEETING BASIC SURVIVAL NEEDS		HUMANS LIVING IN HARMONY WITH NATURE
NATURE	OCURRING IN NATURE		MACHINERY VS. NATURE	MOST AUTHENTIC STATE	PRESERVATION OF NATURE

CASE STUDY: THE CAMERA

SURROUNDINGS (PHYSICAL REALITY) → CAMERA (CAPTURES) → PHOTOGRAPH (TRANSLATES) → HUMAN (INTERPRETS) → SURROUNDINGS (UNDERSTOOD DIFFERENTLY)

HOW DOES TECHNOLOGY SHAPE THE RELATIONSHIP BETWEEN HUMANS AND THEIR SURROUNDINGS?

IF/THEN

MY ISOLATED BEHAVIOR:
THROUGH FRAMING, THE CAMERA SELECTS INFORMATION FROM AN ENVIRONMENT.

IF: THE CAMERA SELECTS INFORMATION FROM AN ENVIRONMENT BY FRAMING IT...

THEN: IT BECOMES PART OF THE PHOTOGRAPHIC REPRESENTATION.

INPUT: ENVIRONMENT/VISUAL INFO

OUTPUT: SELECTED PHOTOGRAPHIC REPRESENTATION

PLAN

OUTCOME IN MOTION

Code a screen showing an environment—maybe a photograph of a room, street, or studio.
The user controls a camera frame over the environment.
As they move the frame, the system changes what information is represented.
The user can:

- move the frame
- zoom in/out
- crop
- click to “capture”
- change the exposure/light
- hide/show things

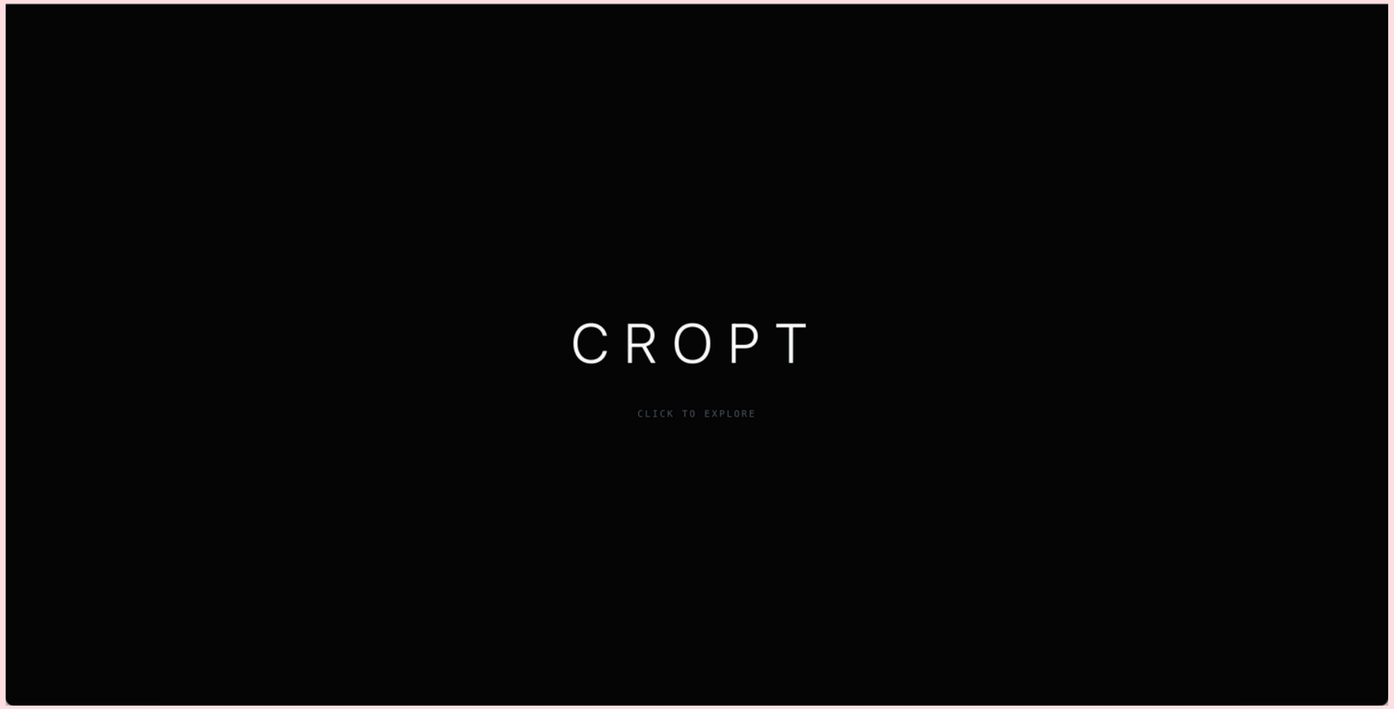

So that every action produces a different representation.

IF/THEN

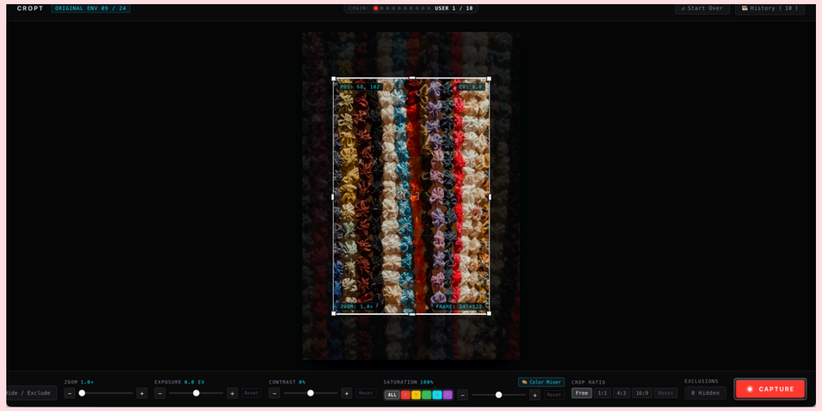

IF the user selects something, THEN the system changes the representation based on that selection.
RECEIVE AN INPUT + PRODUCE RESPONSE = INTELLIGENCE

CROPT

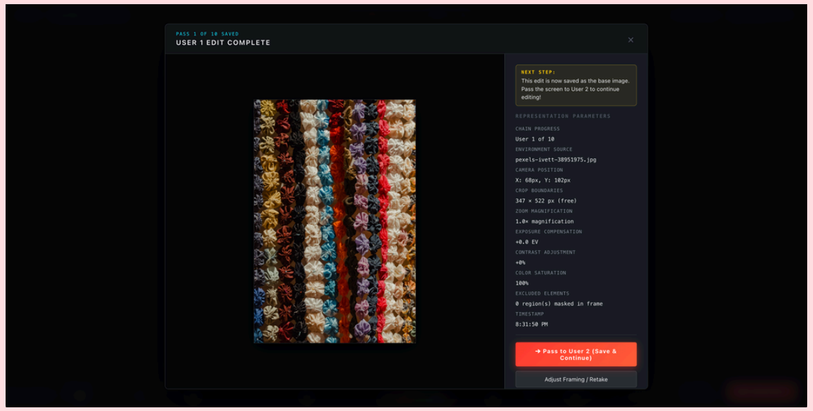

HOW IT WORKS

1. Homepage

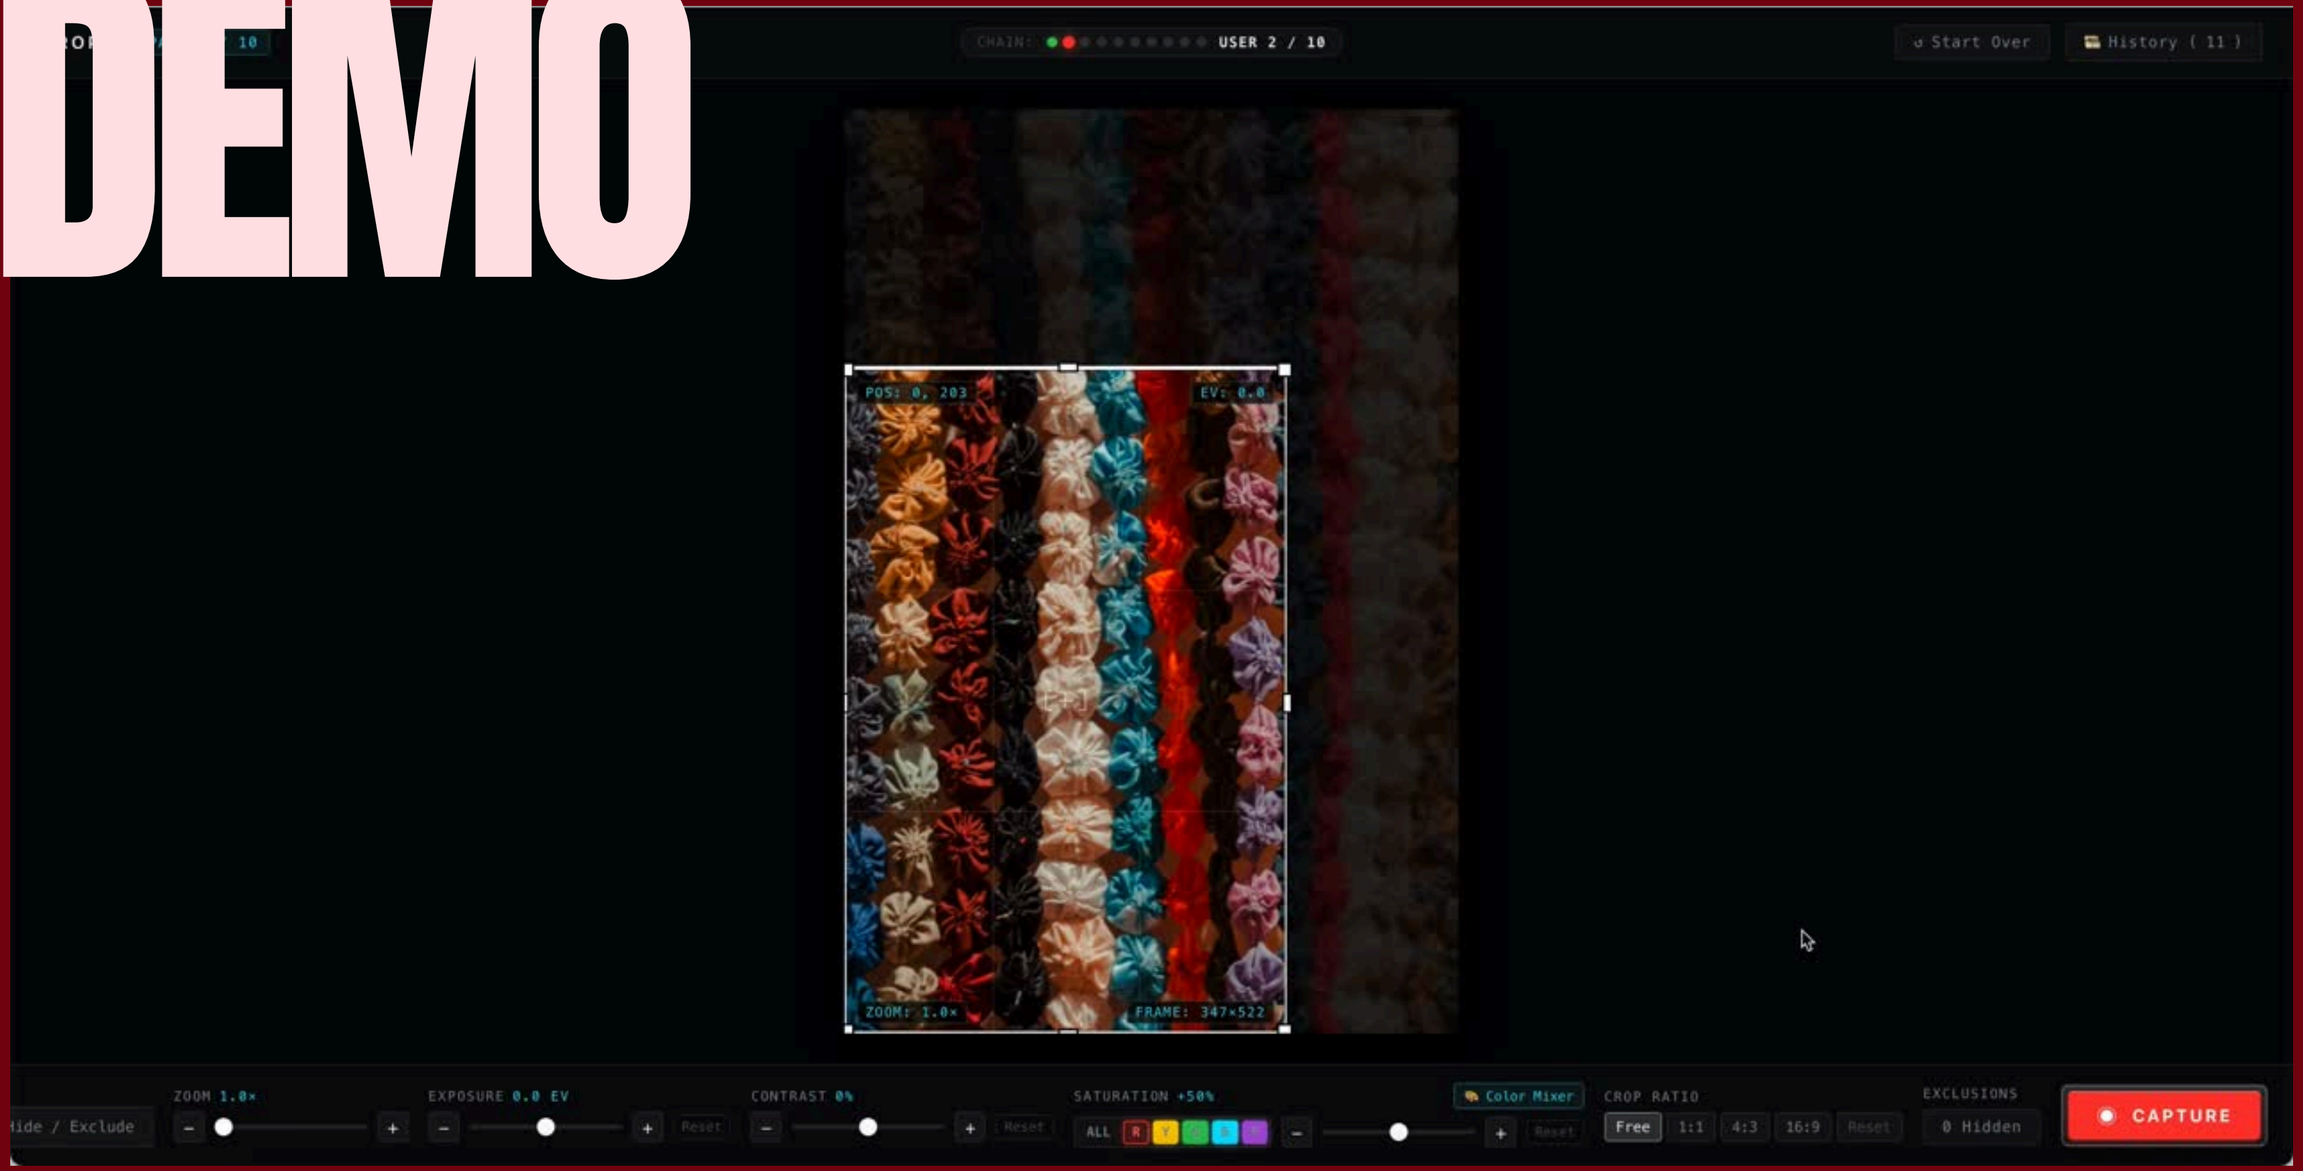

2. Given a variety of ways to frame the environment

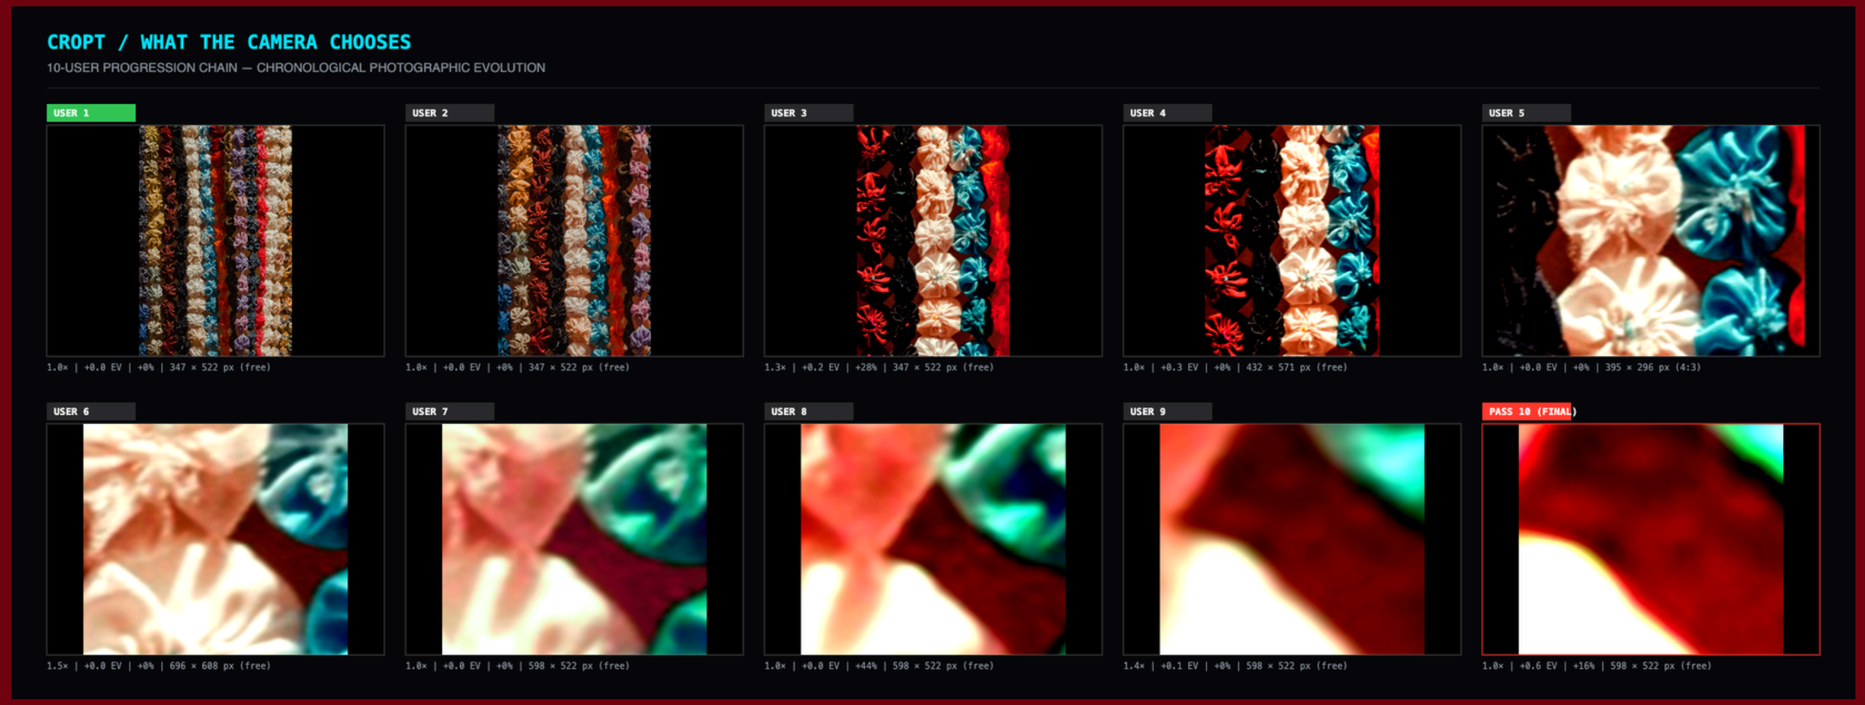

3. After image is altered, it is passed to the next user
